Domain Expertise

8

Government

We work with national and regional level government bodies as well as city municipalities. Much of our domain strength also centers around quasi government agencies like trade association and development funds along with city municipal departments.

Education

Much of our client base consists of drivers in today's education and learning environment. From marketing an education brand to creating messages that reach out to core groups like parents, students, investors etc. we are deeply investing in the domains of education and specialized learning.

Telecom

Telecom is a core vertical area of focus with telecommunications service providers, managed service providers and MVNOs as customers. A number of partnerships in this space has been established with key network equipment providers and ISVs to better service customers.

Domain Expertise

Pharmaceuticals & Healthcare

Pharmaceuticals and Healthcare

The company works with a number of Pharmaceuticals and Healthcare majors in key areas such as enabling regulatory compliance through automation, security supply chains, patient management and accounting, claims processing, portals etc. to provide the right information in real time.

Retail and manufacturing

Retail and manufacturing

Both retail and manufacturing segment require a collaborative ecosystem approach to success. We have rendered multiple solutions and services its e-Commerce Center of Excellence to areas such as multi channel Retailing, supply Chan, Multilevel Marketing, Warehouse Management system, RFID, Real time Inventory Management etc.

Consumer Loyalty

Consumer Loyalty

We design, develop and manage full-fledged in-store retail programs for our clients, with both points and privileges based rewards. Our proprietary SaaS based technology platform is built to be an elastic with a configurable front end and a scalable back end.
